

MPG INVESTMENT UPDATE

MPG Seaford Meadows Property Trust

The Trust is
targeting a 6%¹
cash return for
FY27

We are pleased to provide you with an update to the Information Memorandum (IM) of the MPG Seaford Meadows Property Trust (Trust) dated 30 April 2015. This Investment Update is issued by MPG Funds Management Ltd (MPG) (AFSL 227114, ACN 102 843 809) in its capacity as Trustee for the Trust and should be read in conjunction with the IM.

The MPG Seaford Meadows Property Trust consists of a 5,275 sqm neighborhood shopping centre comprising a full-line Woolworths supermarket and 11 specialty tenants located within an expanding housing estate in Seaford Meadows (SA).

BWS completed its fitout works and commenced their 10-year lease at Seaford Meadows Shopping Centre in December 2025. The opening of BWS has been a long-awaited outcome for the centre and is a welcome addition that further enhances convenience for local customers.

An Independent Valuation undertaken in July 2025 valued the property at \$25.75 million. The Directors resolved to hold this valuation as at 30 June 2026, representing an increase from the prior year valuation of \$25.50 million. The NTA as at 30 June 2026 is \$1.15 per unit.

The bank debt facility was successfully rolled over for a new two-year term in June 2026. The Trust achieved its targeted cash return to Investors of 6% for the year ended 30 June 2026. The forecast cash return for the year ending 30 June 2027 will remain at 6%¹.

Investment Update Best Practice Disclosure Principles

As part of MPG's best practice policy we have set out six benchmarks and eight disclosure principles which, if followed, we believe will help Investors understand, compare and assess risks and returns across investments in unlisted property schemes.

Set out below is a table which lists each benchmark and disclosure principle. The information will be updated whenever there is a material change to the Trust and not less than once a year. Updated information will be available at www.mpgfm.com.au.

Benchmarks		Benchmarks Met?
1. Gearing Policy	MPG maintains and complies with a written policy that governs the level of gearing at an individual credit facility level.	Yes
2. Interest Cover Policy	MPG maintains and complies with a written policy that governs the level of interest cover at an individual credit facility level.	Yes
3. Interest Capitalisation	Any interest expense of the Trust is not capitalised.	Yes
4. Valuation Policy	MPG maintains and complies with a written valuation policy in relation to the assets of the Trust.	Yes
5. Related Party Transactions	MPG maintains and complies with a written policy on related party transactions, including the assessment and approval processes for such transactions and arrangements to manage conflicts of interest.	Yes
6. Distribution Practices	The Trust will only pay distributions to Investors from its cash from operations (excluding borrowing) available for distribution.	Yes

GEARING RATIO

This indicates the extent to which the Trust's property assets are funded by interest bearing liabilities. It gives an indication of the potential risks the Trust has in terms of its level of borrowings due to, for example, an increase in interest rates or reduction in property values. The gearing ratio is a risk factor that investors should weigh up against the Trust's rate of return.

The gearing ratio is currently 54% calculated by dividing total interest bearing liabilities by total assets.

INTEREST COVER RATIO

This indicates the Trust's ability to meet its interest payments on borrowings from earnings. Interest cover measures the ability of the Trust to service interest on debt from earnings. It provides an indication of the Trust's financial health and is used to analyse the sustainability and risks associated with the Trust's level of borrowing.

The Interest Cover Ratio for the period to 30 June 2026 was 1.93 times calculated by dividing EBITDA (earnings before interest, tax, depreciation and amortisation) by the interest expense.

SCHEME BORROWINGS

This disclosure helps investors understand the significant risks associated with the Trust as a result of borrowing as well as the maturity dates of borrowings.

Borrowing maturity and credit facility expiry profiles are important information where a Trust borrows to invest. Credit facilities that are due to expire within a relatively short timeframe can be a significant risk factor, especially in periods where credit is more difficult and expensive to obtain. A failure to renew borrowing or credit facilities can adversely affect the Trust's viability. Breaches of a loan covenant may result in the lender being able to require immediate repayment of the loan or impose a freeze on further drawdowns on the credit facility. Amounts owing to lenders and other creditors of the Trust rank before an investor's interests in the Trust.

The Trust has total Bank Borrowings of \$14,250,000, which is secured against the property held by the Trust as a first ranking charge. The amount owing to lenders and other creditors rank before other investors in the Trust.

The LVR covenants of the loan are 65% of the value of the property and the Interest Cover Ratio covenant is 1.50 times.

In the event that MPG is replaced as Trustee this will trigger a default event and the loan may be immediately due and payable to the lender.

The debt is currently 100% hedged and will expire on 30 June 2028.

PORTFOLIO DIVERSIFICATION

This information addresses the Fund's investment practices and portfolio risk.

The quality of the properties held by the Trust, including the quality of leases entered into over those properties, is a key element in the financial position and performance of the Trust. Generally, the more diversified the portfolio, the lower the risk that an adverse event affecting one property or one lease will put the overall portfolio at risk.

The property located in Seaford Meadows South Australia was settled in June 2015. It is 100% occupied and has a weighted average lease expiry of 5.37 years.

The property's most recent Directors' valuation was \$25.75 million in June 2026 and the most recent Independent Valuation was \$25.75 million in July 2025.

RELATED PARTY TRANSACTIONS

This will help Investors understand and assess the approach MPG takes to transactions between MPG and its related parties.

All related party transactions have been approved by the Board of Directors of MPG and are undertaken on an arm's length basis under normal terms and conditions. All related party transactions are outlined on page 49 of the IM.

MPG is in compliance with its stated policies and procedures for related party activities.

DISTRIBUTION PRACTICES

This will help Investors understand how the Trust will help fund distributions to Unitholders and whether distributions are sustainable.

MPG will make distributions to Unitholders on a quarterly basis in arrears or such other time as MPG is permitted to do so under the Trust Deed. Anticipated distributions for future periods will be sourced from net Trust income. The distribution for the quarter ending 30 June 2026 will be 1.5 cents per unit which resulted in a distribution of 6% for the year. The forecast distribution for the year ended 30 June 2027 will remain at 6%¹.

WITHDRAWAL ARRANGEMENTS

Information on how and when Investors may be able to exit their investment in the Trust.

The Trust Deed allows Unitholders to withdraw in limited circumstances. An investment in the Trust is to be considered illiquid. The Trust is to be considered a long-term investment with an initial term of seven years with the exit mechanism as outlined on page 13 of the IM. The next MPG Seaford Meadows Property Trust term rollover date is 31 March 2029.

NET TANGIBLE ASSETS

The net tangible assets (NTA) value disclosure gives Investors information about the value of the tangible or physical assets of the Trust and is calculated as (Net Assets-Intangible Assets+other adjustments) / number of Units on issue.

Based on the most recent unaudited financial statements, the NTA of the Trust is \$1.14 per unit as at 30 June 2026.
